Compression at each arm's best configuration
Bar = active groups split by domain; pale backdrop = features retained after prevalence filtering; label = groups and reduction vs retained
Acid high (pH > 8.0)
ARC-only fusion Order
64.0
(17% fewer)
BAC-only fusion Genus
63.0
(33% fewer)
Both domains fused ASV
37.8
(52% fewer)
