Bacteroidales__b8 (12 ASVs) 6/6
Bacteroidales__b7 (4 ASVs) 6/6
−0.075 −0.050 −0.025 0.000 0.025 0.050 0.075
Mean log-contrast coefficient over 6 outer fits (pale bar = range across fits)
Archaea (ARC assay)
Bacteria (BAC assay)
Right-hand counts: outer fits agreeing on the sign / outer fits where the block survived training-partition prevalence filtering.
